C-SDHS and NDHS Welding Student Pass Structural Welding Test

Nine seniors from both Cambridge South Dorchester High School and North Dorchester High School have achieved the qualification for the American Welding Society D1.1 Structural Welding Test. They are Christopher LeCompte, Tanner Warrell, Tyler Windsor, Drew Walker, Payton Thomas, Michael Bradley, Brendan Hill, Zachary Lewis, and Christian Lewis. The students performed industry standard welds on test plates in the vertical and overhead positions with Low Hydrogen filler metal and then prepared coupons from the plates for submission to a bend test performed by a third party. This is the same test that is recognized by many employers in the industry for employment and shows students that they have successfully learned to perform welding, measuring and cutting operations to a specific criterion.
