MathFest Competition

Mace's Lane Middle School sent nine students to compete locally in the 2017 MathFest Competition held in Hyattsville, MD. Students participated in team and individual competitions to qualify for the Regional event. The 8th grade team worked diligently and completed more than the required questions to qualify. The 8th grade team consisted of Jose Gonzalez, Ian Henry, Kortney Manokey, Sydney Powers, and Deen Wright. Brooks McDuffie and Ricky Argueta Barrios qualified during the individual competition by solving a series of rigorous mathematics problems. Our math champions will attend the Regional competition in March 2018.
